INDUSTRIES

LEGENDARY BAMBI BUCKET

SEI Industries Ltd. first introduced the original Bambi Bucket® to the firefighting community in 1982. This lightweight, strong, flexible firefighting bucket, with its relatively low-cost 'plug-n-play' capability, promoted usage of helicopters on wildfires and saw immediate success as a firefighting tool. By combining the Bambi Bucket with SEI's already-existing water storage tanks and bladders for fire suppression, a sought after and valuable product line was created.

Used Around the World

Today, more than 30 years later, SEI services 95% of the world's aerial firefighting water bucket market. Globally, the Bambi Bucket brand is known amongst firefighting agencies and it has become synonymous with aerial firefighting. The legendary Bambi Bucket is now used in more than 110 countries around the world by more than 1,000 helicopter operators.

BAMBI BUCKET VALVES

KEEP IT SIMPLE...

Bambi Bucket®

- Simple technology
- Fully collapsible and lightweight
- Single, full salvo drop
- Foam/gel/retardant compatible
- Available with PowerFill Snorkel option

TAKE IT TO THE MAX!

Bambi Max™

- Unlimited valve actuations
- Unlimited load control
- Low power draw, 3-wire system
- Low maintenance
- Available with PowerFill options

HEAVY DUTY MISSION.

Torrentula® Bucket

- Unlimited multiple drops
- Variable flow
- Pilot load control
- Ideal for heavy lift helicopters
- Available with PowerFill options

POWERFILL

Bambi Power Pack™

A portable, rechargeable power supply used with Bambi Bucket and Bambi MAX allowing them to be operated independently of the helicopter power supply.

PowerFill™

Designed specifically for Bambi Buckets; available in externally mounted snorkel or integrated into Bambi Max, Torrentula Valves. Allows bottom-filling capability from as little as 18 inches (45 cm) of water. Provides for quicker turn times by accessing shallow water sources and facilitating quicker dips. Also allows for load control at dip sites.

Torrentula® Modular Case™

The Modular Case is a self-contained hard case rack-mount system, designed for plug n' play and easy storage of Torrentula Controller, PowerFill Controller and Remote Power Supply.

Sacksafoam™ Systems

The Sacksafoam is a foam injection system designed for simple transfer and dispensing of aerial firefighting foam in a bucket. Allows for precise, reliable foam injection to enhance your drop effectiveness on the fireline.

Mobility Sled™

Convenient one-person operation with a rugged, lightweight design. Easy to steer and brake, the three-wheeled aluminum mobility cart comes equipped with 16" foam-filled, all-terrain tires, a tow bar and can be quickly dismantled for shipping. Roll on, winch and go!
